

Sediment Records of Biomass Burning and Global Change

Edited by

James S. Clark Hélène Cachier
Johann G. Goldammer Brian Stocks

NATO ASI Series

Series I: Global Environmental Change, Vol. 51

NATO ASI Series

Advanced Science Institutes Series

A series presenting the results of activities sponsored by the NATO Science Committee, which aims at the dissemination of advanced scientific and technological knowledge, with a view to strengthening links between scientific communities.

The Series is published by an international board of publishers in conjunction with the NATO Scientific Affairs Division

| | |
|--------------------------------------|-------------------------------|
| A Life Sciences | Plenum Publishing Corporation |
| B Physics | London and New York |
| C Mathematical and Physical Sciences | Kluwer Academic Publishers |
| D Behavioural and Social Sciences | Dordrecht, Boston and London |
| E Applied Sciences | |
| F Computer and Systems Sciences | Springer-Verlag |
| G Ecological Sciences | Berlin Heidelberg New York |
| H Cell Biology | London Paris Tokyo Hong Kong |
| I Global Environmental Change | Barcelona Budapest |

PARTNERSHIP SUB-SERIES

| | |
|----------------------------------|---|
| 1. Disarmament Technologies | Kluwer Academic Publishers |
| 2. Environment | Springer-Verlag/Kluwer Acad. Publishers |
| 3. High Technology | Kluwer Academic Publishers |
| 4. Science and Technology Policy | Kluwer Academic Publishers |
| 5. Computer Networking | Kluwer Academic Publishers |

The Partnership Sub-Series incorporates activities undertaken in collaboration with NATO's Cooperation Partners, the countries of the CIS and Central and Eastern Europe, in Priority Areas of concern to those countries.

NATO-PCO DATABASE

The electronic index to the NATO ASI Series provides full bibliographical references (with keywords and/or abstracts) to about 50000 contributions from international scientists published in all sections of the NATO ASI Series. Access to the NATO-PCO DATABASE compiled by the NATO Publication Coordination Office is possible in two ways:

- via online FILE 128 (NATO-PCO DATABASE) hosted by ESRIN, Via Galileo Galilei, I-00044 Frascati, Italy.
- via CD-ROM "NATO Science & Technology Disk" with user-friendly retrieval software in English, French and German (© WTV GmbH and DATAWARE Technologies Inc. 1992).

The CD-ROM can be ordered through any member of the Board of Publishers or through NATO-PCO, Overijse, Belgium.

ACKNOWLEDGMENTS

First, and foremost, I wish to thank NATO for the bulk of the funding. The NATO office responded rapidly to all requests for assistance, and they showed great patience during book preparation. NSF provided an additional contribution to support student participation, and the Quaternary Center of Duke University contributed travel support.

Bill Schlesinger suggested I approach NATO and provided advice and support throughout the planning and book preparation. Deborah Lawrence and Jean Porter coordinated travel and organization before and during the meeting. Brenda Cleveland provided invaluable editorial assistance. Chapter reviews were provided by workshop participants supplemented by anonymous outside reviewers.

Finally, I'd like to thank two mentors for many of the workshop participants, neither of which could attend the workshop itself. Ed Goldberg inspired much of the interest in this subject, and his presence was felt in many of the talks, some delivered by his former students. He expressed his regret at being unable to attend. I am particularly indebted to H.E. Wright Jr. on personal and professional levels. I thank him for his support during my student days at Minnesota, where my research on fire got off the ground. Much of the workshop agenda followed research directions instigated in collaboration with Herb, and his name came up often in casual discussion about fire.
