

Forest Engineering Research Institute of Canada

Wildland Fire Researcher

Railroad Program

The Forest Engineering Research Institute of Canada (FERIC) is a non-profit research organization involved with advancing the effectiveness of harvesting, silviculture and wildland fire operations in Canada. (visit www.feric.ca for more background)

Our Wildland Fire Operations Research Group (WFORG) located at Hinton, Alberta is developing a new research program on railway related wildland fires and we require a researcher to deliver the program. The candidate will have demonstrated ability to work independently and creatively and have a minimum of 5 years experience with wildland fire and / or railway operations. The candidate will hold a degree or diploma in forestry or engineering and have good analytical and communications skills. A competitive salary and benefits package is offered.

Please send resume by June 30, 2006 to:
